For the first time, we are launching the 'LIVE Streaming on Facebook Page'. This would fetch you enormous marketing benefits by reaching more targeted audience through Face book and also you can showcase all your events more effectively.

### WEBCASTING, LIVE VIDEO STREAMING, VIDEO ON-DEMAND

we offer live webcasting services for your events, we offer top-notch video solutions for corporate events like seminars, conferences, business meetings, anniversaries etc. and also domestic events such as wedding, sangeet, mehendi, reception, birthday party etc. our unique embedded player can be placed directly on a web page and can be played directly from that page. create and customise your own online tv channel or video streaming for your website which is easy to use and maintain. great experience for viewers. we offer a pay-per-view playlist with which our customers can now get paid when someone wants to watch your video content. we offer white label live and on-demand video solutions and fully customizable publishing tools so our customers, users and clients can enjoy working with us.

### CORPORATE WEB TV, RADIO & VIDEO SOLUTIONS

our corporate video solutions enable employees to communicate on an ongoing basis frequently, inviting two way dialogue and understanding. enterprise video solutions - self-driven video communication enables internal communications like seminars, live video conferences. our web tv solutions provide for a seamless communication and purely green oriented, there by saving transport costs, time issues and other costs.

### DIGITAL SIGNAGE

digital signage is a display device (typically a led / lcd / plasma tv or a computer monitor) which is used as an in-store sign to display constantly changing, computer generated, animation, photo-realistic graphics, full motion video, and text.

STS digital signage manager is simple to deploy and manage without having to incur huge costs normally associated with such services. the technology has been designed keeping in mind the need of businesses and professionals who do not have the time or the facility to setup such marketing tools; but have the need to promote their products and services with a goal to increase revenues.

### DIGITAL MARKETING SEO & SMO

for over a decade, internet has become a highly powerful and quicker medium to reach the targeted audience in a very less time with cheaper advertising costs. in india, search engine optimization concept is being implemented since 1999, but it is neither so effective nor profitable in those days. later, the wide use of search engines by the public to search content made the search market hot and notable. especially, the usage of google has been growing day by day made it almost to be a monopoly in the search marketing industry.

### MOBILE APPS

shreem technology services efforts in successfully building many software products and solutions around data synchronization and telephony applications. while studying the needs of our clients, we have come out with generic frameworks to address the specific needs of the clients. we help our clients turn around their software faster using our frameworks. our vast experience and research on mobile computing technology have helped us come out with such generic solutions. our frameworks support diverse mobile platforms and diverse technologies like.
